PROFESSIONAL SUMMARY

Detail-oriented Computer Security and Forensics student at Jaramogi Oginga Odinga University of Science and Technology (JOOUST), with hands-on experience in ICT support, network administration, and cybersecurity gained through industrial attachment at the Office of the Governor, Vihiga. Skilled in server administration, network services, system troubleshooting, and security-focused projects. Strong communicator with proven time management balanced 7 courses alongside a capstone project while meeting all deadlines.

EDUCATION

Bachelor of Science in Computer Security and Forensics

Jaramogi Oginga Odinga University of Science and Technology (JOOUST)

2021 – 2025 (Expected)

INDUSTRIAL ATTACHMENT

ICT Attachee

Office of the Governor, Vihiga — ICT Department

May 2025 – August 2025

- Maintained and supported computer systems, networks, and ICT infrastructure, ensuring minimal downtime for staff
- Diagnosed and resolved hardware, software, and connectivity issues for end users, reducing repeat incidents through root-cause fixes
- Participated in network administration and server management, supporting daily ICT operations

- Configured and maintained network services including SMTP, FTP, and remote access systems
- Assisted in user account management and system administration tasks
- Prepared and maintained accurate technical records, documentation, and ICT reports for the department
- Contributed to ensuring availability, reliability, and security of ICT resources

ACADEMIC PROJECTS

Secure Referral Simulator

- Developed a secure referral system simulation demonstrating secure data transmission and access control mechanisms in the health sector.
- Applied cybersecurity concepts to enhance confidentiality and integrity of sensitive information

Steganography Project

- Explored techniques for secure information hiding and data protection

Network Administration Project

- Configured and managed network services including SMTP mail, FTP, and remote access systems
- Demonstrated practical understanding of server configuration, network communication, and system administration
- Configured a peer to peer network.

Web Application project

- Developed a secure web application for online shopping

Location Management Schemes Project

- Studied and analyzed location management schemes used in mobile networks for tracking and updating device locations
- Examined how location areas, paging, and location updates work to balance signaling load and network efficiency

- Explored security and privacy implications of location tracking in cellular networks

Kerberos Authentication Protocol (Coded Implementation)

- Collaborated in a team to implement the Kerberos authentication protocol from scratch, coding the Authentication Server (AS) and Ticket Granting Server (TGS) flows
- Built client-server ticket exchange with secure session key distribution and mutual authentication
- Applied cryptographic principles to prevent replay attacks and ensure secure authentication

TECHNICAL SKILLS

Cybersecurity & Forensics: Vulnerability Assessment, Risk Analysis, Digital Forensics Principles, Steganography, Security Monitoring, Incident Response

Network & Systems: Server Administration, SMTP & FTP Configuration, Remote Access, Network Troubleshooting, Windows & Linux Administration

Technical Support: Hardware Installation, Software Configuration, User Support, System Maintenance

Tools: Kali Linux, Wireshark, Nmap, Microsoft Office Suite, Networking Devices

PROFESSIONAL SKILLS

- **Communication:** Presented forensic findings to a panel of technical and non-technical reviewers, translating complex data into clear insights
- **Time Management:** Balanced 7 courses and a capstone project, delivering all deadlines on time
- **Team Collaboration:** Worked with a 3-person team to complete an incident response simulation

- **Problem-Solving:** Diagnosed and resolved hardware, software, and connectivity issues for end users during ICT attachment, reducing repeat incidents through root-cause fixes
 - **Attention to Detail:** Maintained accurate technical records and ICT documentation, and produced precise transcriptions from audio/video recordings
 - **Technical Documentation & Reporting:** Prepared ICT reports and maintained system records to support departmental operations
-

ADDITIONAL EXPERIENCE

Freelance Virtual Assistant & Transcriptionist

2023 – Present

- Performed data entry, document management, and administrative support tasks for multiple clients
- Produced accurate transcriptions from audio and video recordings
- Managed client information while maintaining confidentiality and professionalism
- Balanced multiple client deadlines, strengthening time management and communication skills

CERTIFICATIONS

- Cisco Introduction to Cybersecurity
- Cisco Introduction to Cybersecurity badge
- Cyber Shujaa Security Analyst (in progress)
- Cisco Python and Programming badge
- Cisco Introduction to Ethical Hacking and Penetration Testing
